Speaker Impedance Matching Transformer

The Bogen Model T72510 transformer is speaker-matching transformer that allow an 8-ohm speaker to be connected to 70V or 25V amplifier outputs. An 8-ohm secondary connects to the speaker and the multi-tap primary connects to the 70V or 25V amplifier output.

T72510 can be tapped at 10, 5, 2-1/2, 1-1/4, and 5/8 watts. All wires are easily accessible.

- **Allows an 8-ohm speaker to connect to 70V or 25V amplifier outputs**
- **T72510 Power Taps: 4, 5, 2-1/2, 1-1/4, 5/8 watts**
- **Easily-accessed, stripped and tinned wire terminations**
- **Small, compact, and cost-effective**
